Ref: Recommendation letter for Mr. Muhamed Khatib

To whom it may concern,

As the Dean of the Faculty of Computer Science, where I follow the work of about 100 carefully selected talented students, I can say that I am very aware of their individual capabilities and qualities. Knowing *Muhamed Khatib* during all four years of his studies, I can confirm that he is a very good student.

Mr. Khatib is a young, nice, polite, dedicated and hardworking student whose grades among other things, show as an example. His hard work resulted in him being awarded the Academic Achievement Award for his Undergraduate studies in 2020-2021. Furthermore, Muhamed's language skills in English are excellent which makes him a good candidate for international studies.

Within the course I teach - Computer graphics - he developed an excellent game in which he showed all his talent, imagination, respect for details and knowledge. As part of the project, his team developed a complete video game in Unity that had its own storyline, 3D models developed in Blender, and game mechanics. The game they created can be used for educational purposes for children to learn spelling without the need for further modifications. The created 3D models and game mechanics required a significant amount of independent work and detailed research to solve the problems they had during development.

I consider it important to emphasize Muhamed's involvement in extracurricular activities during his years of study at the faculty since it significantly contributed to his personal development. This shows that he has a sense of the importance of community development, which I personally consider to be a very important human trait. Here I will list some of his involvement: mentoring of high-school students during the winter academy organized by the SSST University in January 2022, volunteer for WiDS Sarajevo Conference (Women in Data Science), volunteer in the library and helped in translating book titles from Arabic to English, Member of the Entrepreneurship Club, Member of the Enter Club (the main student club in charge of organizing various activities, from charity, student gatherings to promotional events).

It is for all these reasons that I offer a high recommendation for Muhamed Khatib. If you have any questions regarding this recommendation, please do not hesitate to contact me.

Sincerely,

A handwritten signature in blue ink, which appears to read 'Belma R. Brkić'.

Belma Ramić-Brkić, PhD
Associate Professor
Dean of Computer Science Faculty
